

SUMMER CAMP AT HARVARD UNIVERSITY

The summer camp was held in Boston in July 2019 and was open to people worldwide. It lasted for two weeks. On the first day, all of us were assigned to groups based on the table we were sitting on, and we had no say in choosing our teammates. Eventually, we were split into five different groups. Each group was given the same challenge: to build a robot that could follow a track, grab a marshmallow, and put it in a cup without touching the black line that marked the track limits, using sensors and other technology. I was randomly chosen as a team leader because nobody knew each other. I took my role seriously, and by the end of the two weeks, we had a great-looking robot whose design was inspired by Disney Pixar's movie character from Monsters Inc. Mike Wazowski.

Then came the competition, and everything went well until the last part. Due to a wrong calculation, the robot dropped the marshmallow less than a centimeter from the cup and landed on the floor. Unfortunately, because of that problem, we got second place. Nevertheless, it was a fun experience, and I learned new leadership, communication, building, and other skills. I was even awarded the best group leader and received a little porcupine.

CERTIFICATE

FLS INTERNATIONAL *Certificate of Attendance*

This certifies that
Diego Alejandro Rey Beltran
attended our
STEM Camp Program
on the campus of Harvard University
from July 14, 2019 to July 27, 2019
with satisfactory performance.
Best wishes from the entire staff of FLS!

On behalf of FLS International signed and sealed by:
